

1 **ABSTRACT OF THE DISCLOSURE**

2 An inflating/deflating device in combination with an inflatable mattress having
3 multiple chambers includes a casing with an inlet and three outlets, a pump received in
4 the inlet to provide inflation/deflation to the chambers of the inflatable mattress and
5 multiple controllable valves respectively and movably mounted on the outlets such that
6 the pump is able to inflate/deflate the chambers of the inflatable mattress
7 simultaneously.
